Extended Medicare Safety Net (EMSN) – PGT-M / PGT-SR Patients who have reached the Extended Medicare Safety Net (EMSN) threshold may be eligible for 80% reimbursement of eligible out-of-pocket (OOP) biopsy and testing costs, in addition to the standard Medicare rebate. This means final OOP costs for most patients are significantly lower than the headline fees listed in this schedule.

All PGT-A embryo biopsy fees and all PGT-M and PGT-SR biopsy fees (item number 13207) will be billed by your IVF clinic.

***The Extended Medicare Safety Net (EMSN)** is a Medicare scheme that can reduce what you pay out of pocket for eligible services once you've reached an annual threshold. If you have already reached the EMSN threshold, Medicare may pay up to 80% of any further out-of-pocket costs for eligible Medicare-rebated services during the rest of the calendar year. For patients undergoing PGT testing, this may reduce the gap you pay for eligible services.

The below pricing tables are a guide only. If you have any questions about your eligibility for the Extended Medicare Safety Net or whether this applies to you, please reach out to Services Australia.
